Consumer Reports Averta font family (CR-Averta)

Folder structure

- Desktop
 - otf
 - individual .otf font files
 - ttf
 - individual .ttf font files
- Web L
 - Fallback Webfonts L
 - individual .woff and .woff2 files
 - Variable Webfont L
 - variable font .ttf, .woff, and .woff2 files.
- Web S
 - Fallback Webfonts S
 - individual .woff and .woff2 files
 - Variable Webfont S
 - variable font .ttf, .woff, and .woff2 files.

The Desktop folder contains all your desktop upright and italic styles in both otf and ttf formats.

- Font family name is **CR-Averta**
- These are practically the same Averta files you have
- Character set includes Vietnamese and Greek support as well as the full typographic palette of opentype features (oldstyle numerals, small caps, etc.)

The Web S (Small) folder contains the most basic variable font to be loaded as default, and its fallback fonts.

- Character set supports basic Latin and Spanish (as per submitted document)
- Woff2 size is 18kb
- Individual fallback webfont woff2 size is 14kb

The Web L (Large) folder contains the extended variable font, to be loaded when a glyph outside the Unicode range of the S font is called, and its fallback fonts.

- Character set extended Latin
- Some opentype features included (tabular numerals, inferior, superior, fractions, contextual alternates).
- Woff2 size is 42kb
- Individual fallback webfont woff2 size is 34-36kb
